

EuroDebit[®] is an Award-Winning Alternative Billing Solutions Provider that specializes in bringing the latest technological advanced payment platforms to merchants worldwide.

EUDEBITSM usage reaches new highs Alternative billing expands

Pasadena, California

Our EUDEBIT (European Bank Debit) system is the most widely used form of payment in Europe for both one-time or recurring payments. More than 100 million people use the European Bank Debit system to purchase products and services over the Internet, with funds being instantly withdrawn from their bank accounts easily, safely and efficiently. Our EUDEBIT service processes payments in real-time for consumers in Germany, the Netherlands and Austria.

EUDEBIT is the perfect payment method for European

customers with no credit card or those who are reluctant to use them online for purchases and “plastic” of any kind is no longer needed. With the 2000Charge EUDEBIT system, European consumers will thus have an additional and convenient method to pay online, and merchants are guaranteed to increase their sales by offering this local and trusted payment solution.

Merchants further benefit from the GEO-IP service that is included, which automatically provides the payment pages in

the consumer’s native language. In addition, local support phone numbers and email addresses for customer support are posted to manage consumer inquiries.

All of the EuroDebit services include access to secure admin pages with detailed reports and features such as fraud scrubbing, age and/or address verification, and recurring billing services are included. EUDEBIT easily integrates with any existing billing platform and custom setups are available.

MERCHANT ADVANTAGES
